(54) NETWORK SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a network system capable of providing a printer and a scanner of high image quality and high speed to a personal computer user by using a color copying machine which is introduced in a convenience store or the like.

SOLUTION: This network system is constituted of a web server provided with a communication function and a data base for forming a home page, a personal computer capable of communication functions, character input and image display and the copying machines provided with communication functions, an image read function and a printing function and copying machines installed throughout a town. In this case, by sending image data from a personal computer to the web server via a homepage and reading and printing the image data of the web server from a copying machine, even a personal computer user having no printer can make printing outputs.

LEGAL STATUS

[Date of request for examination] 05.11.2002

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3680200

[Date of registration] 27.05.2005

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
